Invited Speakers

The 7th Late Summer Workshop will discuss the state of research and knowledge on *Microplastics in the aquatic environment*. It will feature invited lectures of outstanding scientists in this field.

Dr. Marcus Eriksen

5 Gyres Institute, USA

"Plastic Marine Pollution: Solutions to create a true circular economy"

Prof. Tamara S. Galloway

University of Exeter, UK

"Bioaccumulation and biological effects of microplastics in marine animals"

Dr. Gunnar Gerdtz

Alfred Wegener Institute, DE

"Microplastics: Hype or threat?"

Dr. Natalia Ivleva

Technical University of Munich, DE

"Identification and quantification of microplastics in environmental samples"

Dr. Kara Lavender Law

Sea Education Association (SEA), USA

"Global budget of floating MP in marine systems"

Dr. Heather Leslie

VU University Amsterdam, NL

"Microplastics: What are we measuring and why"

Prof. Rainer Lohmann

University of Rhode Island, USA

"Organic pollutants - sorption to plastics – transport and fate in the oceans"

Dr. Chelsea M. Rochman

University of California Davis, USA

"Plastic Debris: A Chemical CockTALE"

Dr. Lucy C. Woodall

Natural History Museum London, UK

"Microplastics, from the deep-sea to the lab."

"A story of serendipity and interdisciplinary science."

Invitation

Concept

The 7th Late Summer Workshop has been established by the *Water Chemistry Society* (Chairman: Prof. Dr. Torsten C. Schmidt) and its Expert Committee *"Plastics in the aquatic environment"* to provide a forum for young scientists focused on microplastics research. This interdisciplinary approach should aid the development of comprehensive knowledge on all aspects of water chemistry and water quality.

The Workshop will be held at Hotel Seehof, at the shore of Lake of Haltern – a beautiful landscape in western Germany, on the northern edge of the Ruhr region, not far away from Düsseldorf.

In order to enable participation of young researchers a fellowship covering full board accommodation will be made available for all contributions, expecting to be present during the entire workshop. Travel expenses are to be paid by the participants.

Conference Character

The format of the Late Summer Workshops is of the Gordon Research Conference type. Discussion and active participation is integrated. We are looking for a lot of stimulation, thinking and exchange of experiences.

Special consideration will be given to young scientists. The *Water Chemistry Society* feels responsible for development of the rising scientific generation and wishes to encourage individuals to remain in research and active in the development of this field. Attendance will be limited to 50 persons.

Prominent scientists will address the above topics in invited lectures, followed by selected contributions as participant lectures. Significant time will be given for discussions.

Registration

Contribution of Papers and Participation

Contributions from the scientific community to the topics of the workshop are welcome. Contributions will be possible either in oral form (20 min) or as posters to be discussed in special sessions.

Selection of contributed papers will be made by the scientific committee on the basis of the submitted abstracts: Decision criteria will be the scientific quality and relationship to the theme of the conference.

All persons wishing to attend this Late Summer Workshop have to register. Please use therefore the registration form on the web page:

<http://www.wasserchemische-gesellschaft.de/de/lsw-2016>

and submit the completed form and the abstract of 2-4 pages (pdf-file) online to:

sekretariat@wasserchemische-gesellschaft.de

Please register early, but not later than June 30th, 2016. Participants selected will be informed by July 29th, 2016.

Please note: Due to the nature of the workshop, participation must be confirmed by the organisers. No provisions for accompanying persons of participants have been made.

Participation Fees

Non-member of WG or GDCh	€ 100,00
Member of WG or GDCh	€ 50,00

Accommodation

Room reservation will be made at Hotel Seehof. Appropriate forms for reservation will be mailed to all participants selected by August 15, 2016.
